EDUCATION

Masters in Information Systems | University of Maryland - College Park, USA | GPA: 3.94

December 2025

Bachelor of Engineering | Mumbai University, India

June 2020

WORK EXPERIENCE

Premier Health Group - Washington, DC | Technical Lead

Jan 2026 – Present

- Architected an AI-powered patient intake bot to monitor payer portals, score referrals via LLM, and auto-approve or escalate to human review, processing decisions 15x faster. (**FastAPI, Celery, Anthropic API, PostgreSQL, Redis, AWS ECS**)
- Deployed an ambient listening component for behavioral health assessments. Transcribes sessions via Whisper/GPT-4o, auto-drafts clinical forms, saving ~20 min per session. (**Interruption filtering, LLMGuard, Statsig**)
- Launched a real-time EVV dashboard, using WebSockets and Redis Pub/Sub, flagging late check-ins, geofence violations, and improving compliance from 84% to ≥98%. (**React, TypeScript, Redis, PostgreSQL, AWS ECS**)
- Led a 6-person cross-functional team to deliver Release 1.0 of a HIPAA-compliant SaaS product in 15 weeks, scoping and architecting 15+ features across web and mobile. (**React, Flutter, FastAPI, AWS, Terraform, Agile/Scrum**)

Premier Health Group - Washington, DC | AI Engineer Intern

June 2025 – December 2025

- Developed an AI-powered PDF intake assistant using LLMs via OpenRouter, extracting patient documents and prefilling forms in under 90 seconds, with confidence scoring for human review. (**Python, Gemini, Anthropic API, Multimodal AI**)
- Shipped a stateless, HIPAA-compliant EDI parser/encoder product, to validate patient eligibility in Medicaid, catch data mismatches, increasing claim success rate from 74% to 94%. (**Python, FastAPI, React, Terraform, AWS**)

Biz2Credit Info Services Private Limited - Mumbai | Data Engineer

January 2023 – July 2024

- Engineered a batch reporting pipeline for HSBC, processing 10K+ daily loan decisions and aggregating credit metrics into Snowflake; delivered BI dashboards cutting manual reporting by 15 hrs/week. (**Python, dbt, Snowflake, Airflow, SQL**)
- Built ETL pipelines ingesting bank statements, credit bureau feeds, and financial APIs, processing \$20M+ in daily transactions, achieving <5 min data freshness for downstream ML models. (**Airflow, dbt, Snowflake, S3, AWS Kinesis**)

Capgemini Technology Services India Limited - Mumbai | Software Engineer

September 2020 – January 2023

- Deployed cloud-based integration as sole engineer, connecting SUBWAY with ezCater across 10,000+ store locations via phased rollout, with 0 production incidents. (**AWS, API Gateway, Lambda, DynamoDB, CloudFormation**)
 - Investigated 50M+ SUBWAY logs, finding stale inventory as root cause of 4% store-initiated cancellations; built pre-order validation + real-time sync, reducing cancellations 75%+ to <1%. (**AWS Lambda, EventBridge, DynamoDB Streams**)
-

PROJECT EXPERIENCE

Multi-Agent Affiliate Automation Platform

- Built a dual-agent GPT-4o automation pipeline that eliminated manual affiliate outreach. Agent 1 autonomously navigated vendor portals and submitted partnership applications for 30+ vendors.
- Agent 2 monitored Gmail via the Gmail API, triaged approval/rejection emails with NLP classification, and auto-generated listing drafts with extracted pricing and attachments, reducing end-to-end vendor onboarding time by ~70%.

Briefed - LLM Powered Email Triage App | [Live Demo](#)

- Deployed an LLM-powered email triage app, using React, and FastAPI, to solve inbox overload across 3 accounts. Crafted prompt templates with user-configurable sender and topic rules to classify unread emails into labeled categories with summary.
 - Routed LLM calls via OpenRouter, with Gemini 2.0 flash and Claude Haiku 4.5 as fallback. Hosted on AWS using Terraform Infrastructure as Code, with PostgreSQL via Supabase reducing daily inbox review to a curated summary at near-zero cost.
-

LEADERSHIP & OUTREACH

- **AI Workshop Facilitator:** Co-facilitated AI workshop for small business owners; built natural-language warehouse query tool.
 - **Datathon Winner – Executive Pay Analysis:** Trained Random Forest pipeline on 2.8M+ federal records (IRS 990, SAM.gov) predicting executive pay with $R^2=0.86$, identifying job title and grant funding as top predictors.
-

TECHNICAL SKILLS

Languages & Frameworks: Python, FastAPI, SQL, LangChain, LanGraph, React, Typescript, Angular, Bash, HTML5, Celery, Tailwind CSS

AI/ML & Cloud: Generative AI, Multi-Agent Systems, RAG, NLP, PyTorch, Scikit-learn, Pandas, Hugging Face, PostgreSQL, Redis, Snowflake, dbt, Airflow, AWS (Lambda, EC2, S3, ECS, CloudFormation, Kinesis), Terraform, Docker, Azure

CERTIFICATES

- **AWS Certified Data Engineer – Associate**

Issued January 2025
