EDUCATION

Masters in Information Systems | University of Maryland - College Park, USA | GPA: 3.94

December 2025

Bachelor of Engineering | Mumbai University, India

June 2020

WORK EXPERIENCE

Premier Health Group - Washington, DC | AI Engineer Intern

June 2025 – December 2025

- Engineered an OCR-to-LLM pipeline using AWS Textract for text extraction and Llama 3.1 for generating clinical summaries, along with rule-based risk scoring, reducing document review time by 70% for triage specialists.
- Implemented an automated certification-alert system that generates pre-filled forms and PDFs from patient records and sends expiry notifications, saving 6–8 hours per week in manual processing.
- Built an Angular-based UI to operationalize clinical workflows and implemented automated CI/CD pipelines using Terraform, CloudFormation, and GitHub Actions for automated, reliable deployments.

Biz2Credit Info Services Private Limited - Mumbai | Data Engineer

January 2023 – July 2024

- Designed and implemented an ETL pipeline using S3, EMR (PySpark), Redshift, and RDS, deployed via CloudFormation, processing 5,000+ loan applications daily and improving data-processing efficiency by 60%.
- Implemented an internal chatbot utilizing LangChain and OpenAI that converted natural language into SQL queries against Redshift with schema-level guardrails, reducing report turnaround from hours to minutes.
- Automated Tableau dashboards with Redshift integration for real-time KPI tracking (applications, approval rates, FICO scores), reducing manual report generation time by 40%.

Capgemini Technology Services India Limited - Mumbai | Software Engineer

September 2020 – January 2023

- Analyzed AWS CloudWatch logs to identify 4% online order cancellations from inventory shortages; implemented a serverless AWS workflow fix that reduced order cancellation by store to less than 1%.
 - Implemented microservices on AWS (API Gateway, Lambda, DynamoDB) to integrate client systems with third-party REST APIs. Automated with CloudFormation, reducing integration overhead and legacy system disruption.
 - Built an AWS workflow with S3, Lambda, and DynamoDB to automate processing coupon details, to activate them for mapped stores, and update records, eliminating 95% of manual effort.
-

PROJECT EXPERIENCE

Consumer Complaint AI/ML Pipeline

- Built a near real time data pipeline using Azure HDInsight clusters to process ~2.8M CFPB consumer complaints, integrating structured/unstructured data with Data Lake, Spark SQL and real-time dashboards in Streamlit.
- Delivered actionable insights by uncovering hidden complaint themes and segmenting narratives, enabling regulators to better track systemic issues and improve consumer protection strategies.

GenAI Agent for Automating Affiliate Partnership Workflows

- Built two Generative AI agents, one to navigate vendor portals and auto-populate vendor forms, and second to monitor vendor approval emails and generate listing descriptions.
- Developed a React-based UI with Python Flask APIs to trigger and orchestrate AI agents in real time.

Executive Compensation Analytics - Datathon Winner

- Analyzed compensations across 2.8M+ federal grant and non-grant recipient records on IRS 990, SAM.gov, and USAspending.
 - Constructed an ML pipeline, to identify role, business type, and grant funding as key predictors of executive pay.
-

LEADERSHIP & OUTREACH

AI Workshop Facilitator – Small Business AI Agents: Conducted an AI workshop for 25 small business owners with a team of 4 peers under faculty guidance; developed an Inventory in collaboration with business owners enabling natural-language warehouse queries.

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Node.js

ML Frameworks & Libraries: Scikit-learn, Tensorflow, PyTorch, Keras, Pandas, Hugging Face

AI/ML: Generative AI, NLP, Data Mining, Predictive Modeling, Neural Networks, Model Inference, Feature Engineering

Cloud & Big Data: Amazon Web Services (Lambda, Redshift, EC2, CloudFormation, S3, Step Functions), Apache Spark, Azure

Frontend & Frameworks: Angular, React, HTML5, CSS3, Tailwind CSS, Bootstrap, Angular Material

CERTIFICATES

- AWS Certified Data Engineer – Associate** (*Issued January 2025*)
