EDUCATION

University of Maryland, Robert H. Smith School of Business

College Park, MD, USA

Master of Science in Information Systems, GPA: 3.9/4

December 2025

- **AGA Datathon 2025 Winner:** Identified factors responsible for higher federal grants allocation using machine learning.
- **Courses:** Designing AI systems, Data Models, Data Mining and Predictive Analysis, Big Data and Cloud Computing.

University of Mumbai

Mumbai, MH, India

Bachelor of Engineering in Electronics, GPA: 7.52/10

October 2020

TECHNICAL SKILLS

Programming & Tools: Python, R, PySpark, Node.js, Angular

Machine Learning & Analytics: Hypothesis Testing, Confidence Interval, A/B Testing, Decision Forest, Random Forest, Multivariate Analysis, Bayesian Methods, Bagging, K-Nearest Neighbors, K-Means Clustering, Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch.

Gen AI Tools: LangChain, Meta Llama 3, Chat GPT-4o.

Cloud & Data Engineering: AWS, GCP, Data Warehousing, Neo4j, Microsoft SQL Server, Apache Spark, Airflow, MongoDB.

Visualization Tools: Tableau, Microsoft Suite (Excel, PowerPoint, Word, Outlook), Matplotlib, Seaborn.

CERTIFICATES

- **AWS Certified Data Engineer – Associate** (*Issued January 2025*)
-

WORK EXPERIENCE

University of Maryland - College Park | Graduate Lab Ambassador

September 2024 – Present

- Developed a relational database in MYSQL using AWS RDS, to manage inventory for 2,000+ lab equipment, integrated and published an interactive Tableau dashboard for real time insights and data visualization.
- Organize daily lab operations, identify lab equipment requiring replacement or tuning for upcoming lab sessions, assist the professor with lab sessions, and oversee inventory management for over 2,000+ lab equipment items.

Biz2Credit Info Services Private Limited | Software Engineer

January 2023 – July 2024

- Engineered a robust ETL framework for a banking client using AWS S3, AWS Glue, RDS, Python and Redshift as data warehouse, processing over 5,000 loan applications daily, which improved data processing efficiency by 60%.
- Built Tableau dashboards to track key KPIs, like monthly application trends, approval and rejection rates, average FICO scores, and application status, reducing report generation time by 40% and enabling data-driven decisions for senior leadership.

Capgemini Technology Services India Limited | Associate Consultant

September 2020 – January 2023

- Analyzed data for a major fast-food franchise, to investigate online order cancellations. Identified insufficient inventory as the main cause, implemented solution using AWS lambda, API Gateway, DynamoDB reducing the 4% store cancellation rate to zero.
 - Developed Tableau dashboards to track 4 KPIs including regional sales performance, product popularity, order type distribution, and online order cancellation reasons to optimize business operations and enhance customer satisfaction.
-

PROJECT EXPERIENCE

Suicide Analysis on World Data

- Built an explanatory model on the World Bank dataset to identify the factors contributing to global suicide rates worldwide.
- Addressed multicollinearity, non-normality and heteroscedasticity. Used SHAP to analyze influential factors across countries.
- Identified top 4 factors influencing suicide rates through decision tree analysis, importance plot, and partial dependency chart.

Patient Survival Prediction

- Developed a predictive model focused on predicting survival rates for patients undergoing HCT with a goal of providing accurate predictions of a patient survival chance at a successful transplant outcome.
- Built XGBoost and Cox-Proportional Hazard models to evaluate the impact of covariates. Used k-fold cross validation for hyperparameter tuning. Combined the outputs leveraging the strengths of both methods to improve prediction accuracy to 71%.

GenAI Agent for Automating Affiliate Partnership Workflows

- Developed a GenAI Agent to autonomously fill and submit vendor affiliate application forms using OpenAI APIs.
- Leveraged Selenium for dynamic web navigation and Chat-GPT 4o model for field-value mapping based on provided input data, reducing manual form-filling time by approximately 80%.
